PROFILE

Aspiring Software Engineer with strong foundations in Object-Oriented Programming, data structures, and application development. Experienced in building scalable, user-centric software systems across mobile and web platforms. Seeking an opportunity to contribute to real-world engineering problems and grow as a developer.

SKILLS

Languages & Database: Swift, Java, C++, Python, JavaScript | MySQL, MongoDb
Core Concepts: OOP, Data Structures & Algorithms, REST APIs, MVC/MVVM
Frameworks & Tools: SwiftUI, UIKit, MERN Stack, Xcode, Git, Jira
Practices: Agile Development, Debugging, UI/UX Principles

EXPERIENCE

iOS Application Development Intern

Infosys – Education, Training & Assessment | Dec 2025 – Jan 2026

- Built iOS applications using **Swift, SwiftUI, UIKit, and Xcode** following industry coding standards.
- Implemented reusable UI components, navigation flows, and responsive layouts.
- Integrated **REST APIs** with JSON parsing and asynchronous data handling.
- Applied **MVC / MVVM architecture** to develop scalable and maintainable codebases.
- Used **Git and Agile practices** while debugging and optimizing application performance.

Coding Expert Contributor

OutliersAI

- Improved reasoning quality of Large Language Models using **Reinforcement Learning from Human Feedback (RLHF)**.
- Identified logical inconsistencies and hallucinations in AI-generated responses.
- Contributed to enhanced accuracy, coherence, and reliability of large-scale AI systems.

PROJECTS

UniRide – Campus Ride-Sharing & Community Platform - *Swift, SwiftUI, Codable, CoreLocation*

- Developed a full-scale iOS application enabling users to offer and join rides using real-time location data.
- Designed JSON-backed data models, integrated CoreLocation to improve proximity-based discovery.

Electricity Billing Automation System - *Java, OOP*

- Built a Java-based system to automate electricity usage calculations.
- Applied object-oriented principles to ensure modularity and maintainability.

Healthcare Management System - *MERN Stack*

- Developed a healthcare platform supporting appointment scheduling and secure record management.
- Designed REST APIs and dashboards to streamline hospital workflows.

EDUCATION

B.E. Computer Science (3rd Year) — CGPA: **9.01** | Class 12 (CBSE): **85.2%** | Class 10 (CBSE): **92.8%**

CERTIFICATIONS & ACTIVITIES

C Programming | Networking Fundamentals | Blockchain Technologies | Distributed Systems | Hackathon Participant & Team Lead
